

Strategic Planning Network Team Meeting Summary Updates

As a way to keep interested stakeholders informed of the ongoing work to revise the Montgomery County Public Schools strategic plan, a summary of each of the Strategic Planning Network Team work sessions will be created and available in a variety of venues.

Strategic Planning Network Team Work Session # 6 April 24, 2013

The sixth and final meeting of the Strategic Planning Network Team included those members who indicated an interest in working on the measures for the plan. The meeting opened with an update on presentations to the Montgomery County Board of Education, Executive Leadership Team, and principals and central services administrators. Feedback from these meetings was shared including what resonated with the groups, and what was missing. Next, team members received a presentation on what constitutes a good assessment, including qualitative and quantitative measures, and examples of measures that have been used in the past to assess the district's performance.

In mixed groups, team members reviewed the first thoughts about measures generated at the previous meeting and identified systemic measure for the three competency areas.
