Ref: **Sampling for Asphalt Fumes and Hydrogen Sulfide Gas – 6.02.2023**  
Poolesville High School  
KCI Job No. 122302497

KCI Technologies Inc. (KCI) is submitting the following letter report detailing the findings of air sampling of Asphalt Fumes (benzene soluble fraction) and Hydrogen Sulfide gas at Poolesville High School located at 17501 W. Willard Rd. Poolesville, MD 20837 (subject site). Baseline sampling was conducted by KCI's Industrial Hygienist, Mr. Tyler McCleaf, CSP, under the oversight of KCI's Certified Industrial Hygienist (CIH), Mr. Jonathan Coale.

Background:

At Poolesville High School, current renovations and construction has raised concerns from student parents. Students and faculty have voiced concerns related to an odor present in the school while the roofing work is occurring. The parents are concerned the students are being exposed to unsafe conditions related to the asphalt fumes being produced during the roofing installation. MCPS contacted KCI to assist them in collecting data on the school's occupants' potential exposure to fumes related to the roofing work being conducted.

Description of the Work Performed:

On June 2, 2023, KCI conducted air sampling for Asphalt Fumes (benzene soluble fraction) and Hydrogen Sulfide gas levels at Poolesville High School. The sampling of Asphalt Fumes (benzene soluble fraction) was done under method: Modified NIOSH 5042. This method will determine the total concentration of total particulate and the soluble fraction to which an individual is exposed. NIOSH has an adopted value of 5 mg/m<sup>3</sup> Threshold Limit Value (TLV) -Time-Weighted Average (TWA) for asphalt fumes. NIOSH's definition of TLV-TWA is the "concentration for a conventional 8-hour workday and a 40-hour workweek, to which it is believed that nearly all workers may be repeatedly exposed, day after day, for a working lifetime without adverse effect". KCI also utilized a multi-gas meter to collect real time readings of hydrogen sulfide (H<sub>2</sub>S), carbon monoxide (CO), and oxygen (O<sub>2</sub>) levels in various locations throughout the building and exterior. Direct read data was performed to collect short term "grab" samples to determine if the gas was present and was not intended to collect exposure data.

During the time of the air sampling, construction was being conducted, there was no asphalt smell noted outside of the building. KCI placed six (6) sampling pumps set to approximately 1 liter per minute in locations pre-determined by MCPS. It is KCI's understanding that the sample locations selected by MCPS were where complaints were made from students. After all sampling pumps were placed, KCI took real time readings of the hydrogen sulfide levels at each of these locations every 30 minutes inside and

every 30 minutes outside. A sampling location map can be found in attachment A.

KCI conducted the screening from approximately 08:15 until 14:30. Conditions during the sampling period were mostly sunny with temperatures between 69°F - 89°F. Winds were between 0 and 8mph from WNW and NNE with gusts up to 16mph.

After sampling, the cassettes were sealed, logged, bagged, and shipped as required to Galson Laboratories in East Syracuse, NY, where they were analyzed for Asphalt Fume (benzene soluble fraction) Modified NIOSH Method 5042. Galson Laboratories is accredited by the American Industrial Hygiene Association (#100324).

Results:

**Asphalt Fumes (Benzene Soluble Fraction)**

<b>Table 1 – Asphalt Fumes Sampling Summary</b>			
<b>Location</b>	<b>Sample Number</b>	<b>Concentration (mg/m<sup>3</sup>)</b>	<b>Above TLV-TWA?</b>
Hallway – Outside Room 31	PHS – 01I	<0.28	No
Hallway – Outside Room 20	PHS – 02I	<0.28	No
Outside of Gym Entrance (exterior)	PHS – 03I	<0.28	No
New Gym Hallway	PHS – 04I	<0.28	No
Science Building 2 <sup>nd</sup> Floor – Outside Room 284	PHS – 05I	<0.28	No
West End of Portables	PHS – 06I	<0.28	No
Field Blank	PHS – 07I	N/A	N/A
Lab Blank	PHS – 08I	N/A	N/A

N/A: Not Applicable

Laboratory analysis results are included as Attachment B.

**Gas Meter Readings**

<b>Table 2 – Multi-Gas Meter Sampling Summary</b>			
<b>Time</b>	<b>Oxygen (O<sub>2</sub>)</b>	<b>Carbon Monoxide (CO)</b>	<b>Hydrogen Sulfide (H<sub>2</sub>S)</b>
8:20 – 8:35	20.8	0	0
9:35 – 10:00	20.8	0	0
10:50 – 11:25	20.8	0	0
12:45 – 13:10	20.8	0	0
13:55 – 14:30	20.8	0	0

### Olfactory Findings

During walkthroughs, KCI noted the following asphalt smells:

Location	Findings		
	Morning	Mid-Day	End of Day
Exterior Outside New Main Office	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Exterior Between Main Building & Science/Tech Addition	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Exterior By Portables	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Main Lobby	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Art Hallway	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Auditorium Corridor	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Gym Hallway	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Science and Technology Addition	No Asphalt Smell	No Asphalt Smell	No Asphalt Smell
Staff Parking Lot	No Asphalt Smell	No Asphalt Smell	Light Asphalt Smell

#### Conclusion:

In conclusion, the baseline sampling data determined airborne Asphalt Fumes concentrations were below the NIOSH TLV-TWA adopted value during the period of sampling. In addition, H<sub>2</sub>S and CO concentrations were not present or at concentrations below the gas meters detectable range. Oxygen levels were at the expected levels.

During sampling, asphalt roofing activities were being performed.

If you have questions or comments regarding this report, please contact me.

Sincerely,  
KCI Technologies, Inc

**Dear Jon Coale:**

**Enclosed are the analytical results for the samples received by our laboratory on June 06, 2023. All samples on the chain of custody were received in good condition unless otherwise noted. Any additional observations will be noted on the chain of custody.**

**Please contact client services at (888) 432-5227 if you would like any additional information regarding this report. Thank you for using SGS Galson.**

**Sincerely,**

**SGS Galson**

**Lisa Swab  
Laboratory Director**

**Enclosure(s)**

**Terms and Conditions & General Disclaimers**

- This document is issued by the Company under its General Conditions of Service accessible at <http://www.sgs.com/en/Terms-and-Conditions.aspx>. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein.
- Any holder of this document is advised that information contained herein reflects the Company’s findings at the time of its intervention only and within the limits of Client’s instructions, if any. The Company’s sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.

**Analytical Disclaimers**

- Unless otherwise noted within the report, all quality control results associated with the samples were within established control limits or did not impact reported results.
- Note: The findings recorded within this report were drawn from analysis of the sample(s) provided to the laboratory by the Client (or a third party acting at the Client’s direction). The laboratory does not have control over the sampling process, including but not limited to the use of field equipment and collection media, as well as the sampling duration, collection volume or any other collection parameter used by the Client. The findings herein constitute no warranty of the sample's representativeness of any sampled environment, and strictly relate to the samples as they were presented to the laboratory. For recommended sampling collection parameters, please refer to the Sampling and Analysis Guide at [www.sgsgalson.com](http://www.sgsgalson.com).
- Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded and therefore, if carried through the calculations, may not yield an identical final result to the one reported.
- The stated LOQs for each analyte represent the demonstrated LOQ concentrations prior to correction for desorption efficiency (if applicable).
- Unless otherwise noted within the report, results have not been blank corrected for any field blank or method blank data.

**Accreditations** SGS Galson holds a variety of accreditations and recognitions. Our quality management system conforms with the requirements of ISO/IEC 17025. Where applicable, samples may also be analyzed in accordance with the requirements of ELAP, NELAC, or LELAP under one of the state accrediting bodies listed below. Current Scopes of Accreditation can be viewed at <http://www.sgsgalson.com> in the accreditations section of the "About" page. To determine if the analyte tested falls under our scope of accreditation, please visit our website or call Client Services at (888) 432-5227.

L596033 (Report ID: 1363295):

Accuracy and mean recovery data presented below is based on a 95% confidence interval (k=2). The estimated accuracy applies to the media, technology, and SOP referenced in this report and does not account for the uncertainty associated with the sampling process. The accuracy is based solely on spike recovery data from internal quality control samples. Where N/A appears below, insufficient data is available to provide statistical accuracy and mean recovery values for the associated analyte.
