

## Volunteer Opportunity

The Center for Autism Spectrum Disorders (CASD) at Children's National Hospital is seeking volunteers to assist with research studies on autism, including cognitive profiles, memory and learning, and neuroimaging.

Research volunteers will assist with:

- Research appointments with youth and their families
- Data collection and management
- Website development
- Project dissemination

Research volunteers will have the opportunity to meet with faculty, assist with research posters with authorship possibilities, observe research appointments, support an executive function intervention, and attend didactic lectures.

This is an unpaid position. Current projects have in-person components and will require volunteers to be able to get to locations across the DMV (Children's Rockville, Takoma and Fairfax, and local schools or libraries).

Ideal candidates will be high school, college, or graduate students with an interest in psychology and some relevant experience. We strongly encourage applications from the neurodiverse and gender-diverse populations and members of marginalized communities.

**If you have questions or if you are interested in applying, please send your cover letter and resume to Andrea Lopez, CASD Clinical Research Assistant, [autism@childrensnational.org](mailto:autism@childrensnational.org).**
